

A NEW GENERATION OF REGENERATION

Long Harbour's regeneration vehicle has been engineered to aid development and regeneration of UK housing and infrastructure.

In February 2012 Long Harbour was proud to have completed its first 100% privately funded affordable housing project with Barking and Dagenham.

The project will deliver 477 affordable housing units at William Street Quarter and Eastern End of Thames View within Local Authority ownership.

Long Harbour originates and manages long-term assets for a range of institutional investors. The investments demonstrate fixed income and inflation linked characteristics suitable for liability driven investors

Our funds include:

A portfolio of UK residential freeholds which has grown to in excess of 25,000 units within two years, managed by HomeGround, a Long Harbour company

A regeneration fund for Local Authority led housing initiatives

A Private Rented Sector Partnership
