

People Places Prosperity

Midland Heart is working locally to create and support vibrant and safe places to live, work and enjoy.

People

From Carnivals, allotments, art projects, garden initiatives, and environmental improvements, to action groups – we have a track record of being part of inspiring partnership projects.

Places

We are proud of our successes to build quality homes which transform places and lives - promoting independent living and quality of life.

Prosperity

We are passionate about creating and supporting local opportunities for jobs, training and education - building aspirations and attracting investment and growth.

Midland Heart operates in 54 Local Authority areas working alongside our customers and their communities to understand the issues and find lasting solutions. Our work involves, supporting those who need help to live independently, assisting in regenerating communities and helping an individual to discover their own abilities just as much as it involves providing and maintaining homes for more than 70 000 people.

Midland Heart manages 3900 homes in Coventry and has an office in the heart of the city.

The Midland Heart Way is to help transform lives and communities through housing, care and more!
