## BUILDING FOR TODAY, DESIGNING FOR TOMORROW

Croydon has been the location of global management, engineering and development consultancy Mott MacDonald's headquarters for over four decades. During this time we've grown into one of the world's largest independent, employee-owned companies with over 14,000 staff worldwide providing leading-edge solutions across our core business sectors – from transport, energy, buildings, water and the environment to health and education, industry and communications.

With more than 1200 staff based in Croydon we want to help make a real difference to the local environment. Key to this is our commitment to include sustainability through the full life cycle of the projects we work on, making it an integral part of the design process.

If you would like to hear how we can make your projects more sustainable contact:
