

A Fantastic New Town Centre for Canning Town

Bouygues Development is creating a new beating heart for Canning Town for it to become a physical, social and economic transformational catalyst for the area. The masterplan re-establishes Canning Town as a vibrant mixed use centre, re-connected to the existing surrounding commercial areas.

It creates a genuine sense of place, with an identity that is lacking within the current fabric of Canning Town. Massing and density have been balanced with high quality, inspiring public realm to provide a rich tapestry of uses, sympathetic to all.
