

# Changing the face of Hounslow

We're giving a massive makeover to the borough's 259 miles of roads and 458 miles of footpaths.

With an overall investment of £800 million over the 25 year project, the first 5 years will see a core investment of £100 million.

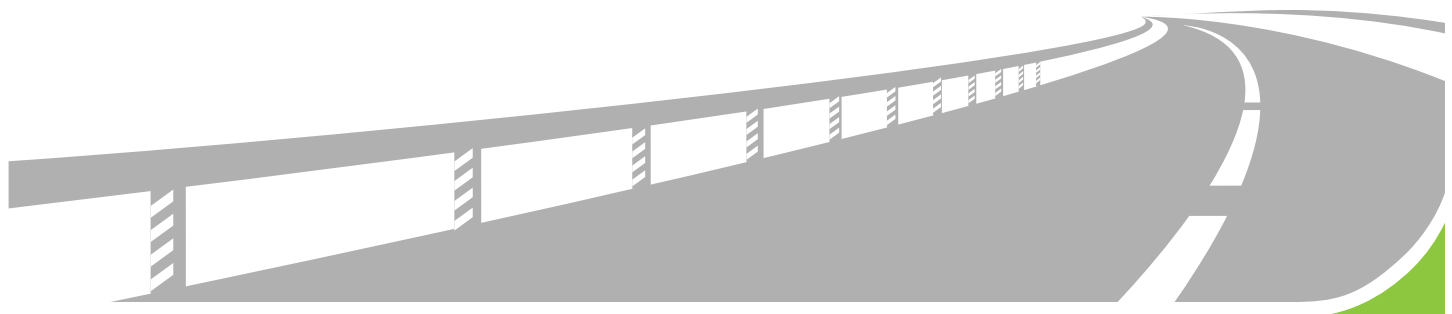

Hounslow Highways will not only complete the installation of new and improved roads and footpaths by 2018, in the first two years, all street lights will be replaced with low-energy, carbon-efficient LED lights.

Greater attention will be given to the 'street scene' in the borough, with better street cleansing, new street furniture and greater community involvement through initiatives.

The investment in the borough's infrastructure will be a cornerstone for Hounslow's regeneration, as well as improving the customer experience and delivering a service of value to residents and local businesses.
