

BAM Nuttall, rejuvenating the Thames Gateway

BAM Nuttall

has recently completed a major land remediation and reclamation programme at the Rochester Riverside site on behalf of Medway Renaissance. The scheme involved the extensive use of dredged material to raise the land level, the construction of new quay walls and the clean up of contamination from a former gas works. The site is now ready for hand over for future development. As one of the UK's largest civil engineering companies we have been involved in many significant infrastructure projects in the Thames Gateway area and are currently assisting in the transformation of the Olympic Park.
