

HIGH FLYING PARTNERSHIPS

At Mott MacDonald we strive to create perfect partnerships, providing the skill and commitment to successfully deliver first class projects locally. We are working closely with both Medway Council and Medway Renaissance to help improve services and infrastructure for communities in the region, delivering a better vision for the future.

We're providing consultancy services covering a diverse range of technical capabilities in areas such as highway design, buildings, telematics, transport planning, flood risk assessments, land use planning, geotechnics, cost consultancy and environmental impact assessments. We combine global experience and resources with a multidisciplinary approach in order to provide the most effective solutions for local projects.
