

BAM Nuttall, rejuvenation of the Thames Gateway

BAM Nuttall

completed the major land remediation and reclamation programme on the Rochester Riverside site on behalf of Medway Renaissance in 2008. The scheme involved the extensive use of dredged material to raise the land level, construction of new quay walls and the clean up of contamination from a former gas works. The site is now in the process of being developed.

As one of the UK's largest civil engineering companies we have been involved in many significant infrastructure projects in the Thames Gateway area and are currently completing our substantial contribution to the civils and landscaping works for the Olympic Park.
