

**Our investment
in technology
has been the
stepping-stone
to four global
markets.**

The investment we have made in developing and perfecting world-leading power technologies has established Rolls-Royce as a landmark for outstanding performance and reliability. To maintain our technological advantage in the civil aerospace, marine, energy and defence markets, we have invested £7 billion in R&D over the past 10 years, with a particular emphasis on

collaborative research involving a network of universities around the world. We have established a global network of University Technology Centres spread across UK, Europe, US and Asia. At Rolls-Royce, our investment in technology is our stepping-stone to the future.
