

We gained a reputation
for engineering excellence,
one detail at a time.

We know it's the small things that make a big difference. In fact it goes a very long way towards explaining why Rolls-Royce has become a world-leader in power systems and services on land, at sea and in the air. With manufacturing and service facilities in 50 countries and customers in well over 150 countries we place a great deal of importance on the detail in order to maintain the

very highest standards that our name has become associated with. It's what our clients have come to expect and we don't do it lightly. Last year alone we invested close to £1 billion in research and development of our products and services. And, like everything else we do, we did it one detail at a time.

Trusted to deliver excellence
