

1.58 million vehicles and **2.5 million** engines were made in the UK last year.*

UK automotive is a vital part of the UK economy and typically generates more than **£55 billion** in annual turnover, delivering around **£12 billion** in net value-added to the economy.*

The automotive industry is the UK's largest sector in terms of export by value and generated **£27 billion** of revenue for the UK in 2011.*

- The British car industry is back and Toyota is proud to be part of its recovery.
- Manufacturing the Avensis, the Auris and the Auris Hybrid at a modern factory located just outside Derby, Toyota has been manufacturing in Derbyshire for over 20 years now employing 3,500 people in advanced manufacturing.
- During those 20 years Toyota has built over 3 million vehicles and currently exports to more than 70 countries Worldwide.
- Toyota chose to locate in Derby for a number of reasons:
 - the availability of a large, skilled and flexible workforce close by with strong roots in engineering and manufacturing
 - a first class environment in which to live and work
 - good transport and logistics links to the rest of the UK and Europe.
- Toyota Manufacturing UK seeks to build and maintain good relationships with local people and businesses and endeavours to contribute to the prosperity of the area by creating a successful company providing long-term stable employment for members.
- Since the start of production in 1992, we have contributed over £4.5 million to a variety of local charities and organisations.
