

# electric hybrid power

In trials in London, electric hybrid buses have shown to use at least 30% less fuel and emit nearly a third less carbon than conventional buses.

Now electric hybrid buses are bringing a cleaner, greener bus service to Reading and giving customers a quieter, smoother ride.

Reading's electric hybrid buses also have generous legroom and free wi-fi on board, making them not only environmentally-friendly, but comfortable too.

That's got to be good for Reading and good for us all.

## Readingbuses

- comprehensive network of bus routes to all parts of Reading
- up to every 10 minutes
- excellent value, especially with unlimited travel weekly tickets
